Frontier Drilling orders DNV Class propulsion Units from Thrustmaster of Texas, Inc.

Thrustmaster of Texas, Inc. (www.thrustmastertexas.com) has contracted with Frontier Drilling to deliver six TH6000ML DNV class mechanical azimuthing thrusters.

The 6000hp (4500kW) units are also part of Thrustmaster of Texas, Inc. growth into supplying primary Dynamic Positioning propulsion and station keeping capabilities to the offshore semi-submersible market. Engineering and components will be started in the current facility and completed in the new 200,000 square foot facility in mid-2009.
