Thrustmaster Thrusters provide the right drive for Cape Horn Trawlers

Thrustmaster recently delivered its fifth Z-Drive Thruster to The Cape Horn Trawler Corporation of Canada (www.thecapehorn.com). This second-generation Z-drive is being used on a 65-foot Trawler Yacht, the sister ship to the one seen here. Called the "second generation Z-Drive" by Cape Horn's president Peter Sever, this mechanical Z-Drive model features the Speed Nozzle, which increases efficiency by 10 percent throughout the power range. This latest drive was shipped to Cape Horn in February for installation on the new ship, which is being built by Cape Horn in Meteghan, Nova Scotia, and will be launched this summer. One of the incredible things about this type of vessel with the Thrustmaster Z-Drive is the range. This yacht is capable of going over 5,000 nautical miles without refueling.
