NEWEST PDPS DELIVERED IN JANUARY, 2002

Thrustmaster recently delivered a portable dynamic positioning system to Global Industries for use aboard the Titan 2. Thrustmaster provided eight 1000 horsepower units as well as the mounting platforms, the self-contained hydraulic power packs, and the interface for the dynamic positioning system.

The Titan 2 is a DNV-classed 440 x 177 ft. catamaran offshore vessel currently working in the Gulf of Mexico.

Global Industries awarded the contract to Thrustmaster in June of 2001. All fabrication, machining, and assembly was completed in-house at Thrustmaster's Houston, Texas manufacturing facility, and Global Industries took final delivery on January 1st of this year. The sea trials were completed on March 14th, 2002 with Russell Hendrix and Don Zadik of Thrustmaster on board.
